

Closing your pool properly can save you time in the spring!

Close it right to open it easy

- Test your pool water with Aqua Chem 6-Way Test Strips. Enter your results in the online water testing for instructions on balancing the pool water.
- Be sure the pool is free of algae and has chlorine residual before closing. Brush, vacuum, and clean out the skimmer basket(s).
- Clean the filter with Filter Cleaner.
- Add Shock Xtra Blue®, OPTIMUM™ Chlorinating Granules, or Shock PLUS® according to label instructions. Circulate for 4-6 hours to disperse throughout the pool.
- Add Algaecide PLUS® or 20% Algaecide according to label instructions. Circulate for 2-4 hours to disperse product through out the pool.
- Winterize equipment per manufacturer's directions. A partial drain may be necessary depending on seasonal demands.
- Cover pool and secure.
- A midwinter shock may be necessary for pools in warmer climates.
